SUMMARY

B.Tech Computer Science (AI) student with hands-on experience building embedded systems and robotics projects using C++ and Python. Strong foundation in data structures, algorithms, and problem solving, with a track record of turning concepts into working, tested systems. Seeking Software Engineering internship/full-time opportunities.

TECHNICAL SKILLS

- **Languages:** C++, Python
- **Core CS:** Data Structures & Algorithms, Problem Solving, Object-Oriented Programming
- **Robotics & Embedded:** Arduino, Sensor Integration, Motor Control Logic, Embedded C
- **Other:** Analytical Thinking, Teamwork, Git/GitHub (version control)

EXPERIENCE

Embedded Systems Intern

June 2026 – June 2026

TechMaghi, Kochi, India

- Built a wireless robotic car using Arduino-based embedded systems and multi-sensor integration for real-time obstacle detection.
- Programmed motor control logic in C/C++ enabling remote navigation and autonomous obstacle response.
- Collaborated with a cross-functional technical team to test, debug, and refine the embedded control system, improving reliability of navigation commands.

PROJECTS

Autonomous Soccer Robot

Personal Project

- Designed and implemented movement control and automation logic for a robot capable of coordinated, autonomous play.
- Engineered real-time coordination between mechanical actuation and control software using C++.

Automatic Drawing Machine

Personal Project (In Progress)

- Designing a CNC-style machine that converts digital input into precise physical drawings by combining robotics hardware with custom control software.
- Applying coordinate geometry and motion-planning logic to translate image data into motor movements.

EDUCATION

Bachelor of Engineering, Computer Science (Artificial Intelligence)

Expected 2027

Providence College of Engineering – APJ Abdul Kalam Technological University (KTU), Thiruvananthapuram

LEADERSHIP & EXTRACURRICULAR

- **NSS Volunteer** – Contributed to community initiatives, developing leadership, teamwork, and communication skills through hands-on service programs.
